Collective Enterprise as a Workplace: A Philippine case

Benjamin R. Quiñones Jr., PhD
 Founder, Asian Solidarity Economy Council (ASEC)/RIPESS Asia
How does social solidarity economy (SSE) respond to the crisis of neoliberal economy?

* ORGANIZE, MOBILISE LABOR TO CREATE AN ALTERNATIVE ECONOMY

Lack of financial means on the part of the poor, marginalised, socially excluded makes LABOR the main contributory factor to resource mobilisation and investment in SSE

SSE is the process of economic activation & mobilisation of LABOR of the impoverished/marginalised sectors of society to foster alternative solutions to the crisis of employment and the welfare state that is systemic in the neoliberal economy.

SSE is part of a movement set to make a different kind of economy, structured around a democratic, equalitarian and communitarian form of economic organisation, seeking to establish itself as an alternative model to neoliberalism (Neamtan, 2002).
CASE STUDY:
PAYOGA-KAPATAGAN MULTIPURPOSE COOPERATIVE (PK-MPC)

PK-MPC was a charitable NGO that re-organised into a multi-purpose cooperative. The case study highlights the socio-economic model of the cooperative in response to the distressed conditions of poor peasants in Isabela province (Philippines) resulting as they were from natural calamities, exploitative practices of landlords and traders, and not so responsible local governance.

The people’s **COLLECTIVE ENTERPRISE** consisted of the production and distribution of organic fertilizer aimed at shifting local farming practice from inorganic to organic agriculture, and with the accompanying support of financial services, technical assistance, marketing support, and capacity building organised jointly by the people through their cooperative organisation.
**COLLECTIVE ENTERPRISE** --> a micro model of an enterprise that contributes to the creation of “Social Solidarity Economy (SSE).

The collective, social solidarity economy enterprise may have the legal personality of a cooperative, association, shareholding company, or membership-based civil society organization.

**LEGAL PERSONALITY** = organisational form of the enterprise

**COLLECTIVE ENTERPRISE** = the people’s joint socio-economic undertaking for the purpose of addressing their basic needs.
Organic Fertiliser produced for member-clients
Organic fertilizer production shop
Native hogs for dispersal to member-clients
The COLLECTIVE ENTERPRISE is evolving into a workplace that:

- is owned and managed by poor/marginalised peasants (reconciles/integrates into one person the functions of worker, manager, and owner which capitalism assigns to 3 separate persons)
- harnesses labour power for the transition from inorganic to organic agriculture
- practices socially responsible governance
- reconnects with communities (solidarity with various stakeholders in the community)
- improves and expands the livelihood base of its peasant farmer-members
- facilitates access of peasant farmers to social protection services of governmental agencies
- transforms landless peasants into rural entrepreneurs
Features of the Collective Enterprise (5 Dimensions of SSE)

Dimension 1. Socially responsible governance

1.1 Marginalized, socially excluded people (i.e. landless peasants) are the owner-managers of the coop. More female members than male. Women occupy leadership positions & majority seats in the CE decision-making body.

1.2 Leaders & managers of the CE are responsible & accountable. They are motivated to serve the people. They adhere to the triple bottom line goals of People-centered development, environmental conservation, and socio-economic sustainability.

1.3 Members are grouped into clusters, at 15 members per cluster, to facilitate broader participation in decision-making
Dimensions of the Collective Enterprise (5 Dimensions of SSE)

Dimension 2. People-centered development

2.1 The CE creates decent jobs for the marginalized, socially excluded

2.2 The CE provides access to affordable financial services, technical assistance, marketing support, and capacity building. It facilitates access to social protection programs of the government.

2.3 The CE offers deposit & loan services to members. Loan facility is geared to promote organic agriculture. The CE operates a livestock & poultry contract farming program to help grow the productive assets of members.
**Engagement with Stakeholders of the Value Chain**

**Engaging social impact investors:** The CBSE actively engages & enters into partnership with social impact investors such as Foundation for a Sustainable Society Inc (FSSI), ICCO Cooperation, HEKS (eco waste coalition), Provincial government of West Vlanderen (Belgium), Phil Center for Agricultural Research and Rural Development (PCARRD), and Dept of Agriculture.

**Engaging with MSMEs:** The CBSE assists members to deal with the micro, small & medium enterprises (SMEs), for: 1) supply of inputs required by the individual enterprises; 2) market disposal of the produce of household enterprises, both crops and livestock; and 3) provision of micro-insurance.
Engage governmental bodies for provision of social protection services:

The CSEE engages concerned government agencies, to provide social protection services to members, such as: SSS (social insurance program), Pag-ibig (affordable shelter), and Philhealth (universal health coverage). The CE also systematically enrols its members for micro-insurance.
Dimension 3. Environmental Conservation

3.1 The CBSE undertakes active campaign against chemical fertilisers & pesticides through promotion/ support for organic agriculture.

3.2 The CBSE’s loan facility is geared to promote organic agriculture. Lower interest for borrowers who shift to organic farming. Higher interest for those who use chemical fertilisers & pesticides.

3.3 Use of waste materials available locally (animal manure, farm wastes, etc) as raw materials for production of organic fertiliser.

3.4 Conduct of seminars on environmental conservation in partnership with governmental agencies & environmentalist NGOs.
Dimension 4. Socio-economic sustainability

4.1 Sources of funds: The CBSE finances its operations mainly from internal funds & revenues of its organic fertilizer business, which accounted for 99.9% of its total revenues in 2014, 2015, & 2016.

4.2 Profitability: Net revenues amounted to PhP 6.08M (US$121,620) and PhP 17.73 M (US$352,617), implying a return on investment (ROI) of 14.85% in 2014 and 25.12% in 2015.

4.3 Access to basic services: More members have access to basic services (housing, water, electricity, public transport. Membership in CE means access to finance, technical assistance, marketing support, and capacity building.
Dimension 5. Edifying Ethical Values

Edifying ethical values are principles that are put into practice and which result in building up the character and dignity of individuals involved in the collective enterprise.

Edifying ethical values of the leadership and general membership of the CBSE include:
1. “Bayanihan”: solidarity/cooperation/working together
2. Respect for the rights of others, rejection of all forms of violence and discrimination
3. People at the centre of development (people & planet over profit)
4. Responsibility, accountability, reliability

Challenges

- Inculcation of long term development perspective and development/access to long-term development finance

- Fostering greater ideological awareness among CE members and the CSO community in general on building social solidarity economy (SSE) as an alternative to neoliberal market economy.

- Mapping (identifying SSE stakeholders/actors, who/where they are, what is their business model, what they do/what products they produce or services they provide

- Building synergies/collaborative partnerships among stakeholders/actors doing similar activities in the same strategic part of the value chain (producers, financing, logistics, marketing/trading, capacity building, research/advocacy, etc.).

- Continuing studies on socio-economic linkages among collective enterprises and the development of value chains (at national & international levels) owned and operated by the poor/marginalised.
