

**Let's know our
local SSE
network!**

Mapping tool

11.11.20220

The trainers invited participants to build a map of SSE network.

The trainers prepared in advance logo&pictures of different local initiatives.

The trainees were asked to add other actors and to present some informations about these initiatives;

The participants identified **3 type of relations** between these initiatives (economic relations; share of resources&logistics; share of knowledge).

SHORT DESCRIPTION OF THE INSTRUMENT

- to facilitate the knowledge of the local context and SSE actors;
- to capitalize the experience of the participants, inviting them to present information about SSE actors;
- to reflect on the type of relationships that may exist between SSE actors;
- to encourage the involvement of participants in the training session.

GENERAL LEARNING OBJECTIVES:

- ## RESULTS:

- Even we initially had a generous time getting to know each other, the exercise allowed me to know the participants better;
- A positive dynamic between the participants - they had the opportunity to exchange information, it was more interesting than if trainers would introduce these information;

RESULTS:

It surprised me to understand the complexity of the connections between the actors

It allows to view the SSE local network
